DIVERIMPACTS AT LES CULTURALES

Les Culturales® will take place on 15th, 16th and 17th June 2021 in Béthény near Reims in the Marne (51).

This exceptional edition of the field exhibition organised by ARVALIS is for arable crops producers looking for innovations to improve the performance of their farms.

Research actions for the transition towards more sustainable agrosystems will be particularly highlighted!

Within the framework of the European **DiverIMPACTS** project, which aims to promote the diversification of cropping systems in Europe, Arvalis & ACTA are offering partners the opportunity to attend several activities related to this theme on 16th June: a round table, a guided tour of the exhibition, and possibly a visit to the Syppre experimental platform in Champagne, which evaluates innovative and diversified cropping systems.

Programme below.
